

MOHIT KUMAR JANGID

PHP DEVELOPER

SUMMARY

As a dedicated individual with a B.com degree and a website development certificate, I am excited to explore career opportunities at forward-looking organizations. My objective is to harness my advanced skills to contribute to the organization's prosperity and continuous improvement

PROJECTS

Starindiia (API Development)

PHP Developer *Sep 2023 - Present*

- Designed, developed, and maintained RESTful APIs for the "Starindiia" project using the Laravel framework, PHP, MySQL, and AJAX to facilitate data communication and dynamic interactions.
- Created and managed API endpoints for various features, ensuring seamless integration of front-end and back-end components.
- Leveraged PHP and Laravel to implement robust server-side logic, including authentication, data processing, and database operations.
- Utilized AJAX to enable asynchronous data retrieval and real-time updates, enhancing the user experience with dynamic content loading.
- Employed MySQL for data storage and retrieval, optimizing database queries and ensuring data consistency and security.
- Collaborated closely with the development team to understand project requirements and align API endpoints with application functionality.
- Developed comprehensive API documentation to guide developers and third-party users in effective API consumption.
- Conducted extensive testing and debugging to ensure the reliability and performance of the APIs, addressing issues and optimizing response times.
- Continuously monitored API usage and performance, making necessary adjustments to meet evolving project needs and user expectations.

Flymasters (API Development)

PHP Developer *Jul 2023 - Jul 2023*

EXPERIENCE

Trainee PHP Web Developer (Laravel)

iSkylar Technologies Jaipur *Jun 2022 - Jul 2022*

- Acquired and improved PHP programming skills to build dynamic web applications.
- Gained a strong understanding of Laravel's fundamental concepts, including routing, controllers, models, and views.
- Assisted in the creation of a user registration and login system using Laravel's built-in authentication features.
- Contributed to the development of CRUD functionality for sample applications, including data validation.
- Collaborated with senior developers to understand and implement database management using Laravel's Eloquent ORM.
- Participated in the setup and customization of routes using Laravel's routing system.
- Created and customized views using Blade templating for seamless user experiences.
- Demonstrated knowledge of the Model-View-Controller (MVC) architectural pattern as applied in Laravel.
- Participated in problem-solving and troubleshooting to overcome development challenges.
- Actively learned and applied authentication and authorization mechanisms in Laravel applications.

Software Intern "CI Framework"

Remote

Mobzway Technologies *Sep 2022 - Nov 2022*

- Collaborated with a remote team on software development tasks related to the Continuous Integration (CI) framework.
- Worked on version control using Git and GitHub, ensuring codebase stability and collaboration within the team.
- Assisted in the deployment and monitoring of software applications in CI environments.
-

Junior Web Developer

Intuit Solutions *Aug 2021 - Feb 2022*

- Played a pivotal role in the development and maintenance of RESTful APIs for the "Flymasters" project, harnessing the power of Laravel, PHP, MySQL, and AJAX to streamline data communication and dynamic interactions.
- Orchestrated the creation of a sophisticated user verification system, encompassing email verification and mobile number validation through secure API endpoints.
- Designed and implemented an OTP (One-Time Password) validation system that fortified user authentication, enhancing account security.
- Crafted a seamless password reset mechanism, capitalizing on OTP-based validation for secure account recovery.
- Harnessed the PHP and Laravel stack to construct and optimize server-side logic responsible for user verification and OTP validation.
- Utilized AJAX for asynchronous data retrieval and real-time content updates, greatly elevating the user experience through dynamic content loading.
- Employed MySQL for data storage and retrieval, applying advanced query optimization techniques to maintain data consistency and security.
- Collaborated with the development team to ensure that API endpoints aligned seamlessly with the application's core functionality.
- Produced exhaustive API documentation, designed to serve as an invaluable resource for developers and third-party users, ensuring API adoption was both efficient and straightforward.
- Spearheaded rigorous testing and debugging initiatives, the result of which was a highly reliable API infrastructure with optimized response times.
- Engaged in ongoing monitoring of API usage and performance, making strategic adjustments to accommodate evolving project requirements and meet the expectations of end-users.

LANGUAGES

English

- Create website layout/user interface by using standard HTML/CSS practices.
- Write well designed, testable, efficient code by using best software development practices.
- Integrate data from various back-end services and databases.
- Gather and refine specifications and requirements based on technical needs.
- Create and maintain software documentation.
- Be responsible for maintaining, expanding, and scaling our site.
- Stay plugged into emerging technologies/industry trends and apply them into operations and activities.

PHP Laravel Developer

IMG Global Infotech, Alwar Jan 2023 - Present

- Developed and maintained website layouts and user interfaces using standard HTML/CSS practices to ensure an intuitive and engaging user experience.
- Wrote well-designed, testable, and efficient code, adhering to best software development practices, resulting in robust and scalable web applications.
- Integrated data from various back-end services and databases, optimizing data retrieval and storage processes for improved performance.
- Gathered and refined specifications and requirements based on technical needs, ensuring alignment with project objectives and client expectations.
- Created and maintained comprehensive software documentation to facilitate collaboration among team members and streamline the development process.
- Responsible for maintaining, expanding, and scaling websites, ensuring their continued performance and growth in response to evolving business needs.
- Stayed current with emerging technologies and industry trends, consistently applying the latest tools and practices to enhance operational efficiency.
- Leveraged a deep understanding of APIs and core PHP to implement advanced features and functionality in projects, including e-commerce platforms and blogs.
- Collaborated with cross-functional teams to develop and execute API integrations, enabling seamless communication with external systems and services.
- Participated in the development of custom modules and extensions to extend the functionality of Laravel-based applications.
- Demonstrated a strong problem-solving approach to address technical challenges and optimize code performance.

- Actively contributed to the ongoing improvement of software development processes and coding standards.
- Leveraged knowledge of Laravel and PHP to deliver high-quality, reliable, and secure web solutions for clients.

EDUCATION

The Complete Web Developer Course

Udemy *Aug 2021 - Dec 2021*

- Successfully finished "The Complete Web Developer Course" on Udemy, which provided comprehensive training in web development.
- Gained proficiency in a wide range of web development technologies and languages, including JavaScript, HTML, CSS, Bootstrap, PHP, and MySQL.
- Acquired essential front-end skills, such as HTML and CSS, for structuring and styling web pages, ensuring a visually appealing user interface.
- Developed dynamic and interactive web content using JavaScript, enhancing user experiences and making websites more engaging.
- Mastered the use of the Bootstrap framework to create responsive and mobile-friendly web designs, optimizing user experiences across devices.
- Gained a strong foundation in PHP, a versatile server-side scripting language, to build dynamic web applications and handle server-side processing.
- Leveraged MySQL to design and manage databases, enabling the efficient storage and retrieval of website data.
- Applied knowledge gained from the course to create a fully functional news website, demonstrating the ability to implement what was learned in practical projects.
- Gained a comprehensive understanding of how various web technologies work together to create dynamic and interactive websites.
- Achieved a significant milestone in web development education, positioning myself as a well-rounded web developer ready to take on a variety of projects.
